ABOUT US

Devolotics is a high school robotics team from Dr. Norman Bethune Collegiate Institute in Toronto, Ontario. Competing in the FIRST Tech Challenge, we are part of an annual worldwide competition aimed at empowering youth to become future leaders in STEM. Alongside ~200 teams around the world, we are honoured to represent Canada at the 2023 World Championships in Houston, Texas.

MISSION

Starting as a group of passionate friends, our experience with FIRST Robotics has shaped & enriched our lives in ways we never could have imagined. Striving to share what we've learned with our community, we seek to empower youth to become future innovators & leaders through the celebration of STEM. To accomplish this goal, we founded the Scarborough STEM Alliance, a non-profit organization with the mission of revitalizing STEM education at local schools in the wake of COVID-19.

OUR IMPACT

Our work with robotics has been recognized by an array of world-class accolades. Empowering youth through robotics and coding workshops, we have engaged over **140 youth**, parents, and educators through the Scarborough STEM Alliance in partnership with local businesses, institutions and the Toronto Public Library. Hosted at elementary schools and public spaces, we champion the largest STEM events in our community since the pandemic.

Recognizing that FIRST robotics involves more than just robots and extends beyond its technical aspects, we established a YouTube channel to share our diverse range of experiences, tutorials, vlogs, and humorous "how-to" videos with an ever-expanding audience. Our efforts have yielded impressive results, with over **200 subscribers** and **50,000 views** amassed within just six months. Moreover, we have garnered over **1000 followers** on Instagram across both the SSA and Devolotics accounts.

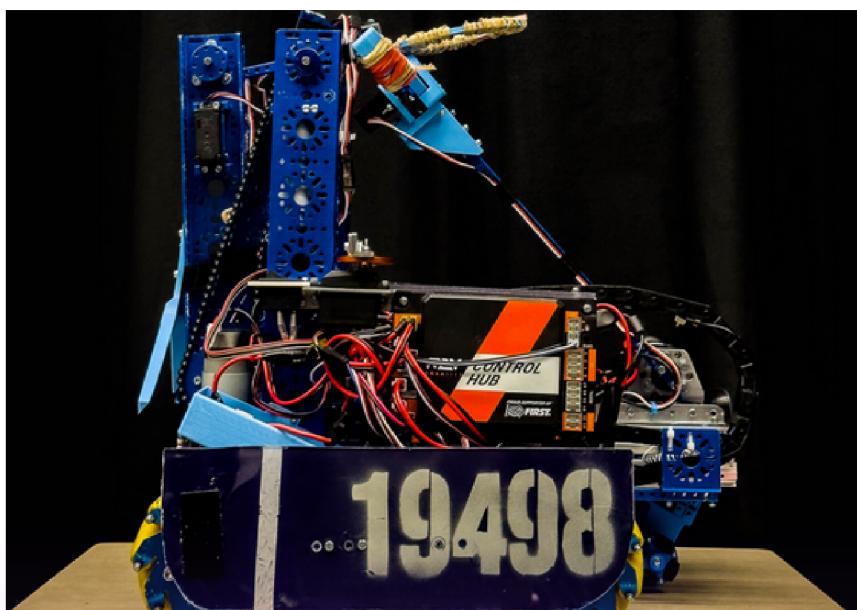

ACHIEVEMENTS
